Company profile

Enterprise integration and complex business systems

We are a software development company based in Zagreb, Croatia. We design and build business platforms that connect applications, data, and workflows through integration hubs and APIs, from requirements and architecture to development, testing, and release.

What we deliver

Complex business systems — Custom applications for demanding workflows, operational requirements, and system integrations.

Enterprise architecture and integration — Multitenant platforms, integration hubs, APIs, messaging, modernization, and data migration.

Digital products and mobile — Web and mobile products connected to enterprise systems, customer services, and marketplaces.

Data platforms and business intelligence — Data integration, warehouses, reporting, and analytics that make information easier to use.

Identity and DevOps — Identity and access management, delivery pipelines, and deployment automation.

AI enabled products — Practical AI capabilities integrated into applications and business workflows.

Efficient delivery

We handle complex requirements with a focus on efficiency and avoid unnecessary complexity. We choose practical architecture and build software that is straightforward to use, implement, and maintain. Our offer combines enterprise experience, end-to-end delivery, and competitive pricing.

One coordinated team

Hands-on technical leadership and a trusted network of partners and specialists form one coordinated delivery team. Our specialists hold TOGAF 9 and SOA Architect (Arcitura) certifications. We incorporate current AI tools into our engineering approach.

Featured project eRegistri

A multitenant application and integration bus providing one application and a unified API for more than 30 Croatian state registers. Our contribution covers platform development, register integrations, and the API layer. Lead contractor: Local Core Solutions d.o.o.

Selected project experience

Transport and tolling — ZET and Promet Split ticketing; HAC ENC device sales and account top-ups. Lead contractor: King ICT.

Healthcare and public services — DCC Hr vaccine distribution (MCS Grupa); Potpis na dlanu mobile digital signing (Libusoft Cicom).

Digital commerce — JOY-O eSIM marketplace: web, mobile, telecom and payment integrations, including the HT bonbon plug-in. Operator: JOYOWORLD PTE. LTD.

Technical foundation: C# / .NET; Microsoft Azure; ReactJS, Angular and Blazor; Flutter and React Native; SQL Server and PostgreSQL; Power BI and Databricks.
